

# T2 & T2E Series Specs

Combination of weatherproof construction and phenolic case makes the T-2 and T-2E series thermometers ideal for outdoor service. These thermometers are also highly suited to installation where vibration typically causes stability problems. Each unit features a red marking pointer to indicate the highest temperature reached between readings.

## SPECIFICATIONS

**INDICATOR ACCURACY:** +2% of span over entire scale.

### Ranges:

30-250° F

50-350° F

0-120° C

0-150° C

20-180° C

**DIAL SIZE:** 3 7/8" diameter.

**BOURDON TUBE:** High torque spiral design; phosphor bronze material.

**CASE & RING:** Fabricated Polypropart case. Brass ring, painted black, with special gasketing between the ring and case to ensure a water-proof construction.

**DIAL:** Aluminum; black background with white letters and scale.

**POINTER:** Aluminum; painted white.

**CASE STYLES:** Direct mount cases available with a ½ NPT union connection located at center back, lower back, or case bottom. Remote mount cases are equipped with a bracket for wall or panel mounting, with the capillary outlet at 30° from horizontal.

### DIRECT MOUNT:

LB = Lower Back Connection

CB = Center Back Connection

BM = Bottom Mount Connection

**CAPILLARY:** Remote mount units are supplied as standard with 10' of double braided capillary.

**RECALIBRATION:** An external adjusting screw, located on the back of the case, allows readjustment of the pointer setting.

**MAXIMUM TEMPERATURE INDICATION:** Each unit is equipped with a "max-hand" that is moved upscale by the temperature indication pointer.
